

Broad Rock Elementary School

Meeting Recap

We know that you are excitedly awaiting the construction of the new school, and we thank you for interest in this process. In case you missed the public meeting that was held on March 9th at Broad Rock Elementary School, we heard from many parents, faculty and community stakeholders who shared their concerns and ideas regarding the construction of the new school. We were successful in listening to and addressing those concerns!

Some of the top concerns expressed were in reference to recreational facilities and advanced technology. We understand that it is critical that the new school feature facilities that are beneficial not only to teachers and students, but to the surrounding community. Also, we are aware that in order to keep our children well-equipped and competitive, we must provide them with the proper training and knowledge in the ever-changing world of technology. Another major concern of the parents and community was the issue surrounding traffic patterns and parking availability. Be assured that this concern was voiced, heard, and will be greatly considered during the construction of the new school.

We were pleased to have Principal Rush speak and share her hopes of providing well-deserved programs to her students, teachers, parents, and the community.. Also, Superintendent Brandon was in attendance to ensure that she stressed the importance of constructing 21st century school buildings, as she shared that the old buildings hamper new education strategies. Dr. Brandon offered a special thanks to the volunteers and meeting attendees for their important role in the BRES community for the past several years. School officials and community members alike - eagerly anticipate ground-breaking this fall!
